PROFESSIONAL SUMMARY

Computer Science undergraduate skilled in Java, web development, and software design. Builds functional applications with clean, structured code. Quick learner committed to solving real-world problems through technology.

TECHNICAL SKILLS

Languages: Java, JavaScript, Python (Basics)

Web: HTML5, CSS3, Responsive Design

Tools: Git, GitHub, VS Code, Browser DevTools

Concepts: OOP, Data Structures, Debugging

PROJECTS

Intelligent Event Management System

Technologies:HTML5,CSS3,JavaScript

- Built a web app for event creation, scheduling, and attendee management with real-time UI updates.
- Implemented form validation and DOM manipulation to enhance data accuracy and user experience.

Beauty Store E-Commerce Platform

Technologies:HTML5,CSS3,JavaScript

- Developed a responsive product catalog with category filtering and a functional shopping cart.
- Applied CSS Flexbox/Grid for a mobile-first, cross-device-compatible layout.

Pizza Restaurant Ordering System

Technologies: Java (OOP, Console Application)

- Created a menu-driven Java console app handling item selection, order tracking, and bill generation.
- Used OOP principles and exception handling to build modular, maintainable code.

EDUCATION

Bachelor of Technology – Computer Science & Engineering

VivekanandaGlobalUniversity,Jaipur | 2024–2028(Expected)

Senior Secondary Education (Science Stream)

RawatPublicSeniorSecondarySchool | Completed2024

CERTIFICATIONS

- Java Programming – HackerRank / Coursera (In Progress) •
- Responsive Web Design – freeCodeCamp (In Progress)

LANGUAGES

English (Professional) • Hindi (Native)
